NEW: StreamKit V2

StreamKit V2 builds on everything we've learned from hundreds of race weekends. We've improved power reliability, expanded connectivity, and added RaceCOM support (driver-to-pit and pit-to-driver communication), making installation easier and operation even more dependable in demanding motorsport environments.

Highlights:

- NEW RaceCOM-ready with integrated 3.5 mm driver headset connection
- NEW Professional 12V power system with dual connection options
- NEW Comprehensive electronic protection against wiring mistakes and electrical faults
- NEW Four USB ports for greater accessory flexibility
- NEW Ethernet connectivity for Starlink or any wired internet connection
- Same proven low-latency RaceStreaming platform, now with even greater reliability and expandability.

StreamKit V2 - Specifications

- **RaceCOM enabled** with internal 3,5 mm mini-jack for driver communication
- **Professional 12V DC power input built-in**
 - Two connection options:
 - Screw mount for +/- wires

New product...

Expand your offering with new products designed to increase customer value and create recurring revenue opportunities.

RaceCOM - Digital driver-to-pit communication

Annual subscription: €996 per StreamKit

- Full-duplex digital communication between the driver and pit wall
- Crystal-clear audio over the RaceStreaming platform
- Can be purchased as an add-on to any StreamKit

Included with every new RaceCOM subscription:

- RaceCOM Push-to-Talk (PTT) USB Adapter
- For StreamKit V1 customers: USB-A to 3.5 mm audio adapter
- StreamKit V2 has the 3.5 mm audio connector built in

New product...

RaceCOM PTT USB Adapter, Stand-alone price: €99

- USB adapter for connecting the driver's Push-to-Talk button
- Included with every RaceCOM subscription
- Included with every new StreamKit with a 30-day free RaceCOM trial
- Included in the StreamKit V1 → V2 upgrade package for existing V1 customers

Please note: RaceCOM will work just fine without the PTT USB Adapter. However, without the PTT USB Adapter, the RaceCOM system will run with “Open-Microphone” from within the car.

StreamKit V1 -> V2 Upgrade Program

Give existing customers the latest StreamKit technology without replacing their entire system. The **StreamKit V1 -> V2 Upgrade Program** adds the new professional power system, built-in RaceCOM support, and includes a full year of RaceCOM, extending the life and capabilities of every existing StreamKit.

Upgrade Price: €996

Existing customers with an active StreamKit subscription can upgrade their StreamKit V1 to the new StreamKit V2.

The upgrade includes

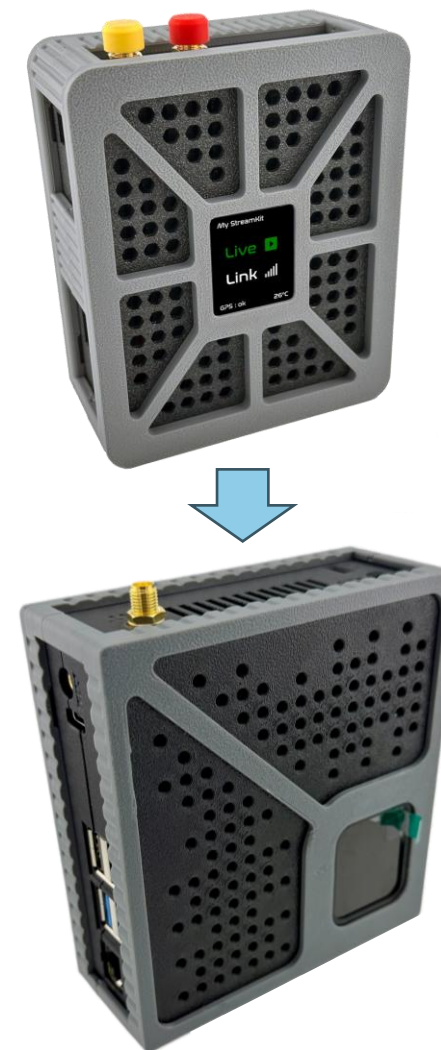

- Professional 12V power system with integrated dual power connectors
- One-year RaceCOM subscription for digital driver-to-pit communication
- RaceCOM Push-to-Talk (PTT) USB Adapter
- All StreamKit V2 hardware enhancements, including the integrated 3.5 mm RaceCOM audio connector

Easy online ordering

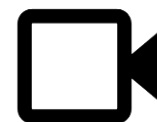

- Customers can order their upgrade through a dedicated online portal (from ultimo August 2026)
- Track the refurbishment process from shipment to return
- Simple and transparent upgrade experience

Availability

- Upgrade program launches end of August 2026

New product...

- **RaceCam PRO**, high-end camera, Price €419
 - High-end Global Shutter image sensor for Zero Motion Blur
 - Plug & Play USB Connectivity
 - No need for external power or battery required
 - Robust, race-proven design for demanding environments
 - 4 x optical zoom for easy adjustments
 - Excellent image quality in all lighting conditions
 - Comparable image quality to DJI and GoPro, without battery changes or unreliable USB connections
 - Supplied with roll-cage mount for true plug-and-play installation
 - External Microphone included

What's Changing?

- All new StreamKit orders will be delivered as StreamKit V2
- The price will remain unchanged €2.500
- StreamKit V1 will be discontinued and no longer available for sale

Included with every new StreamKit

- RaceCOM Push-to-Talk (PTT) USB Adapter
- 30-day full RaceCOM trial

Updated hardware package

- Power bank is no longer included, as StreamKit V2 features professional integrated 12V power connections
- The previous 12V power adapter and rain cover will be discontinued once existing stock has been sold

New RaceCOM-only offering

- For customers who only require professional digital race communication, we will offer:

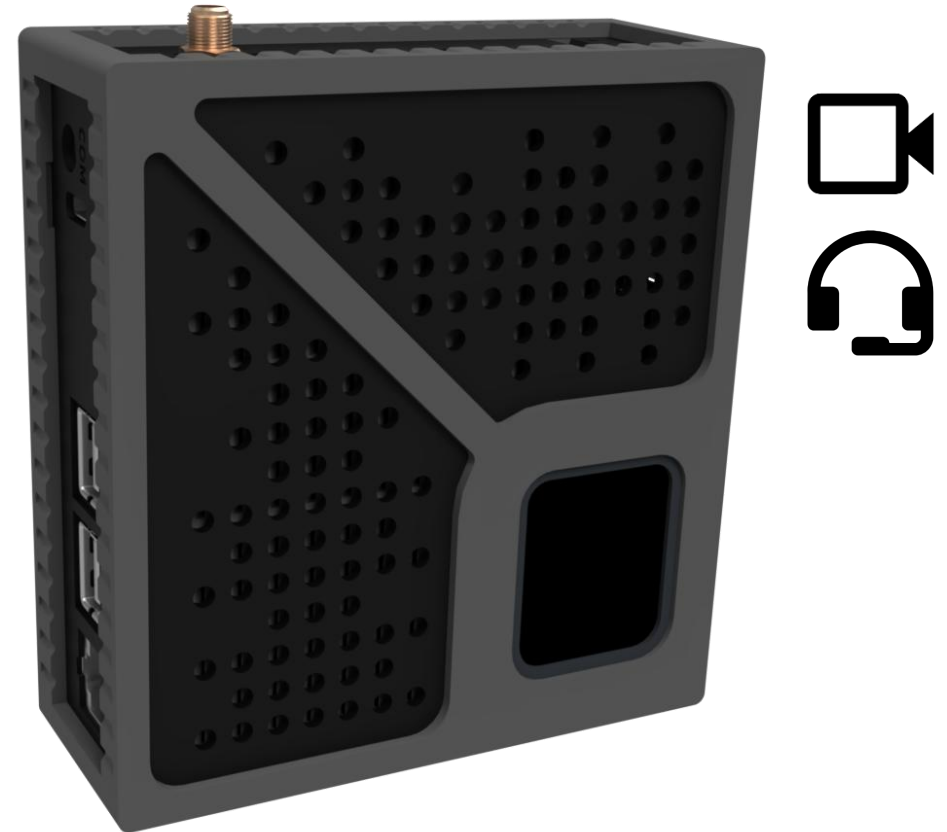

RaceCOM StreamKit, Price €2.500

- Complete RaceCOM platform without live video streaming
- RaceCOM StreamKit uses the same professional StreamKit hardware but is licensed exclusively for RaceCOM.
- Customers can upgrade to the full live video streaming platform at any time.

Main product...

RaceStreaming RaceCOM for digital race communication, €2.500,

- Including first year subscription
- Following years subscription €1.104
- Add-on: Live video streaming for RaceCOM StreamKit's €996/year

Questions and Answers

Q: I want RaceCOM for my existing StreamKit with 6 months remaining subscription. Do I have to pay for a full year of RaceCOM subscription at €996?

A: No. You will pay only 6 months subscription for RaceCOM to ensure it will follow the existing subscription period. ((€996/12 months) * 6 remaining months) = €498)

Q: If I order a V1→V2 upgrade will the price also be adjusted as per above?

A: No. The V1→V2 upgrade is a time limited offer for existing customers and is a payment for the new hardware and work involved. The RaceCOM is added as a part of the upgrade to make the offer more attractive and to show our support to existing customers.

Questions and Answers

Q: Why do I need a to pay an add-on subscription for RaceCOM?

A: RaceCOM is a separate communication stream, isolated from the existing video stream. RaceCOM operates in a separate cloud infrastructure to ensure reliable and stable communication with the driver and within the team. When offering this functionality RaceStreaming carries additional costs associated with offering this service. Many teams already spends €50K-100K annually for their traditional radio communication systems. RaceCOM is a very competitive alternative, that offers digital and high-quality radio communication.

Q: Why will you be offering StreamKit's only with RaceCOM and not including video streaming?

A: Some race teams and race series does not allow live video streaming. However, the need for professional high-end and digital radio communication is still needed. For these types of clients, we offer the product as a radio communication platform, with features built for racing.
